IMPROVED LINDIG SOIL SHREDDER

The new improved Lindig Soil Shredder is a superior machine in many ways. Speedy, thorough, and perfect shredding of soil, peat, manure, compact piles, leaf mold, sphagnum moss, shingle tow, and sods. Easily shreds three to four times the amount of soil that could be screened by hand in the same amount of time. Five models to meet every shredding need.

An ELEVATOR ATTACHMENT and a SCREENING ATTACHMENT are also available. The former can be mounted directly to the shredder and will load or pile material 8 feet high. The latter is designed to remove the rocks, sticks, roots, etc., from the shredded soil; vibration of the screen allows small particles of manure and other humus to pass through.

Write for complete specifications and detailed information.
